

Foundations of Online Module Development Training Course

Course Description

You will learn how to:

- Work with your instructional design team to align outcomes, assignments, assessments, and technology
- Create a positive, engaging, interactive online learning environment
- Create authentic learning activities and assessments that promote deep learning

You also will learn about the course design process at UNH from the research behind our template and storyboard designs to the most effective ways to work with your design team.

Prereqs

The Foundations course does not provide technical training. If you aren't familiar with Blackboard, we will make arrangements for a technical orientation prior to the beginning of the Foundations course. Let us know as soon as possible if you need this orientation.

Technical Requirements

- An up-to-date computer.
- Reliable, high speed internet access at the location(s) where you plan to do your coursework.
- Microsoft Word
- Adobe Reader
- A webcam
- A microphone (built in or external)
- Up to date Java

Length

The course mirrors the template that you will use to design your own module. You will have about a week to complete the self-paced module.

You should expect to spend about 9 hours in the self-paced module reading and watching videos and completing homework assignments. Your assignments will be graded. You will need to earn at least 800 out of a possible 1,000 points.

After you have successfully completed the self-paced training, you will attend a 1-hour webinar with the instructional design staff and grant manager.

The training will take place in late June/early July.
