[Galvanize Launches Accredited Master's Degree Program In the Field of Data Science](#)

Galvanize today announced the expansion of its educational programming with the launch of the GalvanizeU master's degree program in the field of data science.

OCTOBER 23, 2014

[Galvanize U Logo](#)

Galvanize has partnered with the University of New Haven to offer a 12-month Master of Science in Data Science.

Two years ago, Galvanize became a leader in competency-based learning with the creation of the GalvanizeU platform.

"We have spent the last two years creating a community where working and learning are integrated," said Galvanize CEO, David L. Smith.

The GalvanizeU master's degree program will provide students with the skills they need to succeed in the data science field.

"The GalvanizeU curriculum is focused on outcomes," said University of New Haven President, Dr. Robert J. Fazio.

"The University of New Haven provides the highest-quality education through collaborative partnerships with industry and academia."

The master's degree program is targeting recent graduates from engineering, mathematics, and computer science.

"IBM estimates that 90 percent of the world's data was created in the last two years," said Galvanize CEO, David L. Smith.

"There is a huge demand for data scientists with skills and experience," says Steve Allan,

The program's education model features:

Interactive classroom time with expert faculty;

Mentor-driven teaching from industry practitioners;

Opportunities to shadow practicing faculty mentors as they tackle with real-world data science problems;

Lab hours when students can flex their coding muscles building data-science products and prototypes;

Applied learning during supervised internships and capstone projects;

More information about the GalvanizeU program is available at galvanizeU.com.

About Galvanize

Galvanize is a community of urban campuses for digital innovators and entrepreneurs that
